

MYZEL ORGANICS

FULL-SPECTRUM MUSHROOM POWDER

Myzel cultivates organic, GMP-grade mushroom powder in Ontario, Canada. All the inputs required to grow our mushrooms are organically sourced and certified from within North America.

We rely on sustainable production methods to deliver cost-effective powders without compromising on quality or bioactive potency.

Each of our production lots is provided with a third party certificate of analysis to verify the contents, quality and safety of our mushroom powders.

PRODUCT APPLICATIONS

Full-spectrum mushroom powders are ideally suited for dietary supplements, food & beverages, pet nutrition projects, and cosmeceutical applications.

THE POWER OF FULL-SPECTRUM

Myzel produces full-spectrum mushroom powders that includes the mycelium, the antibodies/ enzymes secreted into the fermented substrate, and some of the fruiting bodies.

Blending the mycelium and fermented substrate provides a larger range of health-supporting compounds than fruiting bodies can alone.

Our product formulation is scientifically driven, with verifiable data available to ensure quality and safety for humans *and* pets alike.

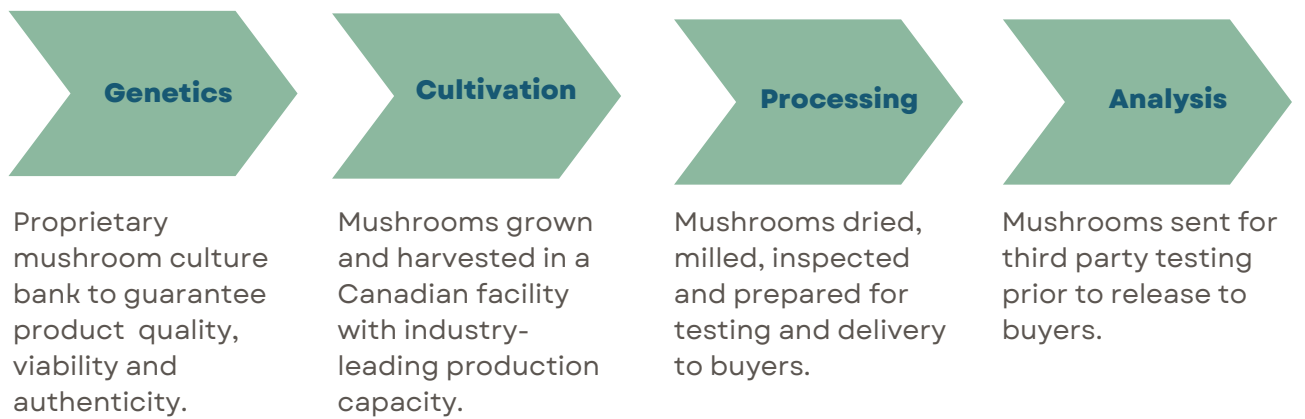

QUALITY GAURANTEE

	PROCESS AND CERTIFICATION
<i>Production</i>	GMP-compliant facility equipped to produce, package and distribute pharmaceutical-grade products.
<i>Laboratory</i>	GLP-compliant mycology lab and quality control systems.
<i>Food Safety</i>	HACCP certified for food safety.
<i>SOPs</i>	Micro controls & monitoring of production processes outlined in Standard Operating Procedures. Every step of cultivation, processing, and packaging strictly adheres to HACCP and GFSI.
<i>QA Testing</i>	Third party external testing for heavy metals, microbial activity, allergens, and mycotoxins.

PRODUCTION PROCESS

Myzel relies on a vertically-integrated production process, with all products manufactured in a sterile, climate-controlled facility to maximize yield and product potency.

FULL-SPECTRUM POTENCY

Each species of mushrooms has its own unique qualities, with applications for daily health and nutrition, sports performance, recovery, and wellness.

Myzel's mushrooms were selected based on a series of reported benefits. Each species contains a wide variety of potent active compounds, including species-specific metabolites (e.g. Cordycepin in Cordyceps, Erinacines in Lion's Mane).

OUR MOST POPULAR MUSHROOMS

Almond Mushroom

Agaricus blazei

Active Benefit:

Allergy reduction
Anti-tumour properties

Chaga

Inonotus obliquus

Active Benefit:

Cardiovascular support
Immune system support

Cordyceps

Cordyceps militaris

Active Benefit:

Athletic performance
Energy enhancer

King Oyster

Pleurotus eryngii

Active Benefit:

Allergy reduction
Inflammation management

Lion's Mane

Hericium erinaceus

Active Benefit:

Anxiety support
Brain & nerve health

Maitake

Grifola frondosa

Active Benefit:

Blood sugar stabilization
Inflammation management

Oyster Mushroom

Pleurotus ostreatus

Active Benefit:

Blood clot reduction
Cholesterol support

Reishi

Ganoderma lucidum

Active Benefit:

Anti-tumour properties
Immune system support

Shiitake

Lentinula edodes

Active Benefit:

Candida control
Digestive support

Turkey Tail

Trametes versicolor

Active Benefit:

Digestive & GI support
Anti-tumour effects

ABOUT MYZEL ORGANICS

NORTH AMERICA’S SUSTAINABLE, ORGANIC, LOW-COST FUNCTIONAL MUSHROOM PRODUCER

Founded in 2021, Myzel retrofitted an existing 36,000 sq ft agricultural facility to run on Net-Zero energy. Our mission: to produce the most sustainably-driven organic medicinal mushroom powders in the industry.

Our team of experts, health professionals, and academic partners prioritize data-driven research to deliver the market's best custom formulations.
